MINXRAY®

High Frequency Portable X-ray Unit for Large, Small and Mixed Animal Practice

Lightest, most powerful 100 kV unit available!

- **Easily Programmed Memory:**For storage of 5 exposure techniques
- mAs/ Time Display Switching Capability
- Integrated Dual Laser Pointers: Provides for accurate x-ray targeting in bright conditions
- High Frequency, Full-wave Rectified Power: Supplies more radiographic power pound for pound
- Automatic Dynamic Line Voltage Compensation: Unequaled repeatability of results
- **Exclusive Five-year Limited Warranty:**Worry-free ownership, coverage includes cables

HF100+ mounted on the 300GS mobile stand for in-clinic imaging.

HF100+ mounted on X100S tripod for field imaging.

High **Frequency** Design

Specifications

The XRT300 x-ray table accomodates the HF100+ to make an ideal compact imaging system for small and mixed animal practices.

HF100+ comes with a highly-protective carrving case.

MinXray's full-wave rectified high frequency units are the most efficient portable x-ray generators in the world. Conventional units (self rectified, line frequency) are only about one-third as efficient as these technologically advanced units. Therefore, considerably more radiation output per pound of system weight is available from the MinXray HF designs. As an added benefit, the output of these units is independent of line voltage variations... a very important feature for field use.
